A. GUIDELINES FOR INTERPRETING THE REPORT

The teacher evaluation report is for developmental purposes and is meant to help identify strengths and areas for improvement. Please consider the following recommendations that will aid in interpreting the results:

1. Examine the report by taking note of patterns in order to consider how best to act on the feedback your students have taken the time to provide. Use the reflection section at the end to reflect upon how you might act on the feedback.
2. These evaluations stem from student perception and thus constitute one source of evidence among others as to the quality of your teaching. Any response to the feedback should be based on the most representative results rather than on outlying responses.
3. Upon getting a general sense as to what has gone well, and which areas may require attention and improvement, it is important to drill down to the related questions. These questions can help guide future action if feedback from students suggest areas for improvement.
4. Keep both the likert scale and written comments in mind while reading through the report. High scores (4+) suggest student consensus indicating a strength. On the other hand, low scores (2-) should be considered as an area that requires immediate developmental focus based on student feedback.

Comment
<p>- Theodore is a committed and dedicated TA whom I feel easy approaching regarding any questions or doubts I may have. He makes a consistent effort to create his own slides which benefited me greatly as they broke down the question/topics into more understandable ways. At the start of every tutorial, he engages the class actively yet educatively via a Kahoot (a live quiz) for us students to ensure we are on the right track with regards to misunderstandings of concepts covered in class. This simple initiative by him was greatly appreciated by the majority of the tutorial class as he had no need to go through the trouble to inspire confidence in our understanding of lesson concepts. Theodore is a consistent and hardworking tutor who made available time even outside tutorial time for any impromptu questions that I had about understanding lectures. His professionalism is greatly appreciated and inspires us to do our best to justify his hardest efforts in teaching us.</p>
- Good teacher
<p>- Theodore Leebrant is very passionate in teaching, always employing methods to engage the students despite the difficult course material, using Kahoot and annotations in an effective manner. He is easygoing and makes sure we are comfortable with clarifying our doubts. He clearly puts a lot of effort into his teaching.</p>

His professionalism is greatly appreciated and inspires us to do our best to justify his hardest efforts in teaching us.
I have listed his strengths below in the reasons for nomination of Theodore Leebrant for teaching awards.
– He was passionate – He taught the right things during the lesson – The prof often used his own notations for proofs etc, and Theodore amended his notes to reflect those of the profs to aid our understanding. – He often held Kahoot sessions at the start of class, it was a great way to recap content. – I would like an explanation from the Lecturer/NUS as to why Theodore was removed from the teaching staff given that he possessed the above good qualities of an excellent TA?
